

PROTECT YOUR INVESTMENT

Premier
Equipment

WAX

- Weekend warrior. Great for a quick show 'n' shine.
- Natural Oils; susceptible to degradation from heat/UV/chemicals.

SEALANTS

- Better than wax; synthetic polymer chain type product.
- Better resistance to UV/chemicals but still limited protection.

GRAPHENE/ SiO₂ CERAMICS

- Entry level, consumer grade DIY Coatings.
- Higher durability rating with better water beading than wax or sealant but limited longevity.

CARBON POLYMERIC

- Professionally installed.
- Bonds to paint/clear coated surfaces.
- High water sheeting abilities.
- UV protection.
- Chemical protection.

SILICON CARBIDE CERAMICS

- Professionally installed.
- Bonds to paint/clear coated surfaces..
- Improves gloss/shine.
- High UV protection.
- High Chemical Resistance.

SILICON NITRIDE + SILICON CARBIDE

- Professionally installed.
- Excellent bonding properties.
- High durability.
- Incredible heat resistance.
- High UV Protection.
- High Chemical resistance.
- Improves gloss/ shine.
- Magnificent hydrophobicity (water beading)
